

A proposal for linking a cycle route to NCR 4

The base for the above map was prepared by Swansea Council to show their plans to upgrade the Old Carriageway Drive. The blue lines have been added to show the west end of Wheelrights cycle route CS (part of which includes ATNM route SWA75). CS is shown on Wheelrights SW Swansea map on the Routes page of their website: <https://www.wheelrights.org.uk/SwanseaCRsw.pdf>. CS needs to be surfaced to make it suitable for cyclists. A horse-friendly form of tarmac is suggested.

Two options for connecting CS to NCR 4 are shown by the broken lines. The westerly option, which goes past the old brickworks, is straightforward as the existing path joins NCR 4 at grade. The shorter easterly option may be difficult due to the topography at the junction.
